

CyFlare Assure: Where Visibility Meets Vigilance

In today's rapidly evolving digital landscape, organizations face many cybersecurity challenges. Advanced threat actors, evolving technology, and vulnerabilities pose significant risks to organizations' data and systems.

CyFlare Assure addresses these challenges by providing comprehensive continuous visibility into your organization's digital perimeter, enabling you to identify and resolve external vulnerabilities and potential attack vectors before serious damage can affect your business.

Know Your Perimeter

Gain complete visibility of your external digital surface, understand validated risk, and potential attack vectors continuously

Focus on What Matters

Concentrate on human-triaged and vetted true positive vulnerabilities

Reduce Your Risk

Minimize your perimeter and attack surface by shutting down unnecessary systems and services, resolve and secure actual vulnerabilities

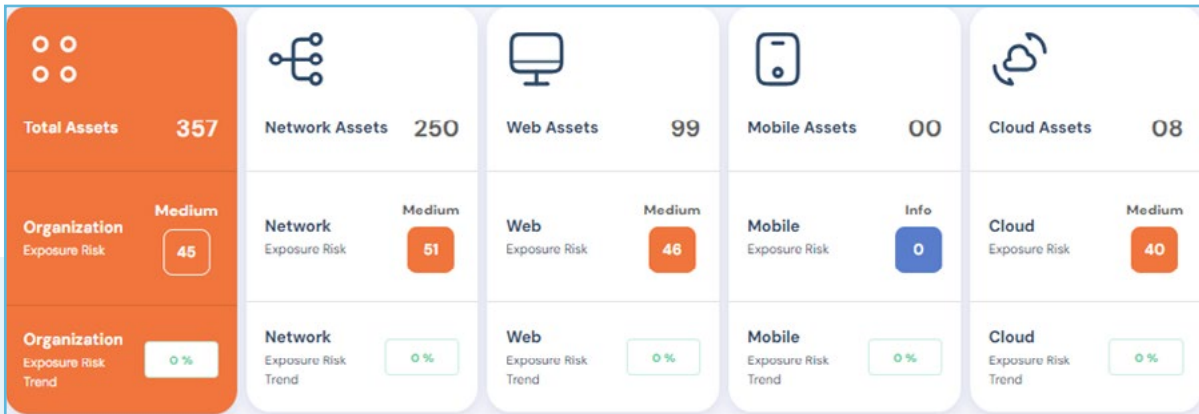

Maintain an ongoing awareness of your perimeter and external attack surface.

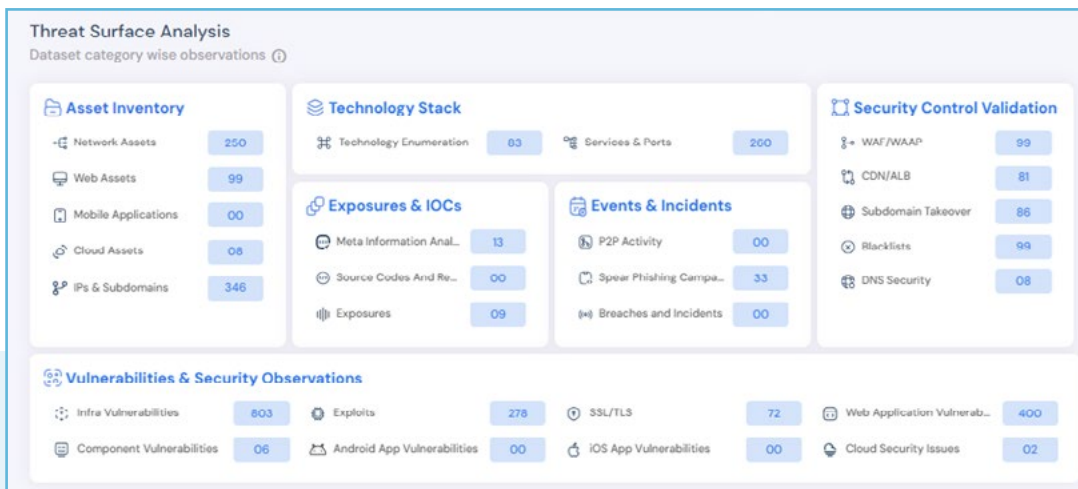

Efficiently mitigate risks by **leveraging human-verified TRUE positives** to fortify critical areas.

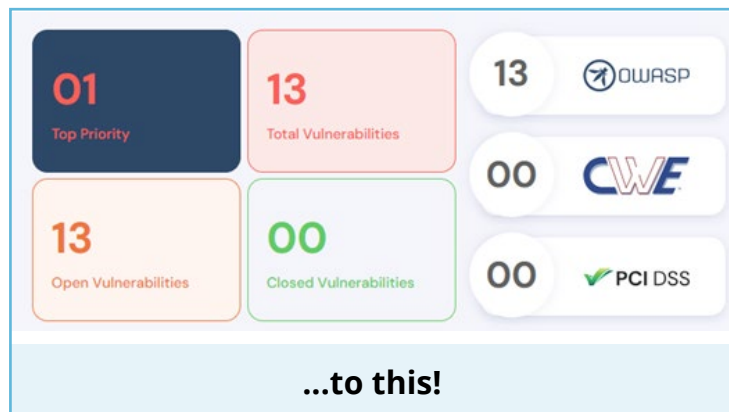

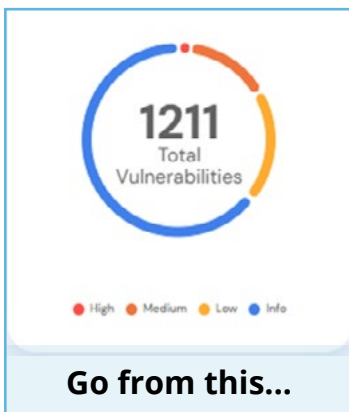

Drastically reduce your organization's digital footprint by over 50%, thus **lowering your likelihood of a breach by as much 70%**.

What's in your perimeter?
