

CyFlare’s future-proofed and powerful ONE platform integrates your tools with ours — delivering true positives, prescribed remediation, and interactive analytics build for management teams.

ONE Complete: The Threat Stops Here

Security events are a given. Safeguard your organization with the CyFlare ONE platform with integrated end-point, network, cloud, and SaaS detection, investigation, auto-remediation, and robust, actionable analytics.

Extended Detection and Response | *Open XDR Platform ingests hundreds of turnkey integrations, delivers AI-drive threat detections, and enables automated workflows and remediation.*

- Anomaly detection
- Cloud-native platform
- Unlimited log collection
- Account Takeover Monitoring

Managed Detection and Response | *Say goodbye to endpoint headaches and hello hassle-free tech with our managed endpoint services.*

- Advanced Endpoint and EDR
- Zero-day protection
- Ransomware insurance policy

Cyber Risk Intelligence | *Reduce your cyber risk and enhance your cyber resilience with an all-in-one, cloud-delivered Risk Management Service.*

- Vulnerability Management
- Dark web monitoring
- Sensitive data discovery

Challenges We Uniquely Address

Your SIEM costs are too high

Your security stack and vendor roster is independent and fragmented

Lack of cohesive analytics to identify trends, patterns, and highlights

Your team is doing the same task repeatedly, not at all, or inconsistently

You need a solution as soon as possible, with a rapid time to value

You need a stable of cyber experts when and where you need it

Why CyFlare?

Feature/Benefit	The CyFlare Advantage	Other MSSPs
Future-proof with Bring-Your-Own Tools	150+ integrations; keep your tools	Use proprietary stack or lose visibility
Transparency	Full access to tools our analysts use	Limited data; pay for custom requests
Cloud-Native	Integrations for AWS, Azure, GCP+	Limited or no integrations
Onboarding Time	Basic monitoring in 24 hours; enterprise onboarding <60 days	90+ days
Achieve Full Environment Visibility	Integrate any tool, including highly niche software with our open API architecture	Always partial visibility
Unlimited Storage	Yes	Price escalation is a source of customer anxiety
Documented Use Cases and Playbooks	We publish what we monitor, how we respond, and why we do it	No accountability; Black box monitoring methodology
Pricing Peace of Mind	Predictable per-user and device pricing	Complex data ingestion pricing
Unmetered Incident Response	We hold your hand through crisis	Basic incident response help, then \$\$
Curated Analytics Platform	Distilled insights to help you improve your security posture	Rudimentary tactical data
