262.5%

Total XDR Sensors Expected

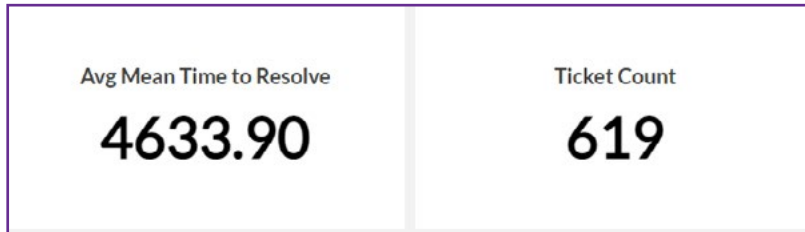

CyFlare ONE is a web-based analytics platform that gives you near real-time insights into what the CyFlare SOC is seeing and doing. In addition, monthly touchpoint calls with a dedicated customer success team allow for discussions around these analytics and what they mean for continuous improvement – both by the SOC (alert tuning, for instance) and by the client (posture betterment).

Some examples of individual reporting dashboards are below:

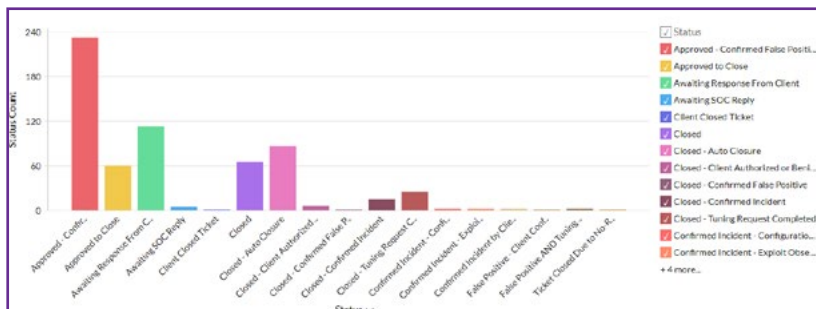

SOC Metrics

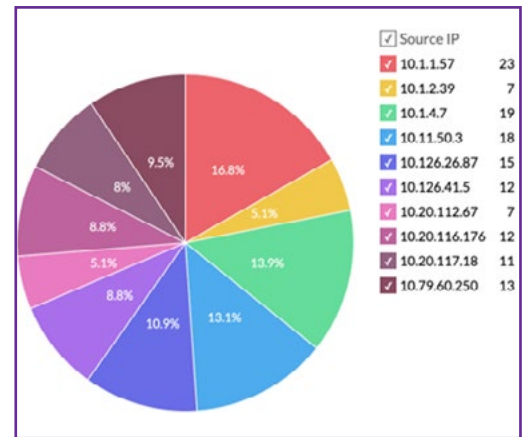

SOC Ticket Summary

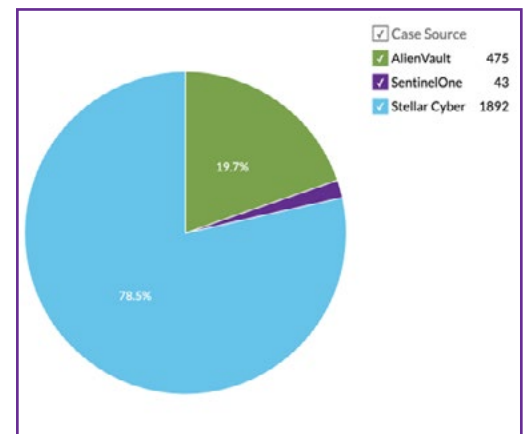

Ticket Outcome Breakdown

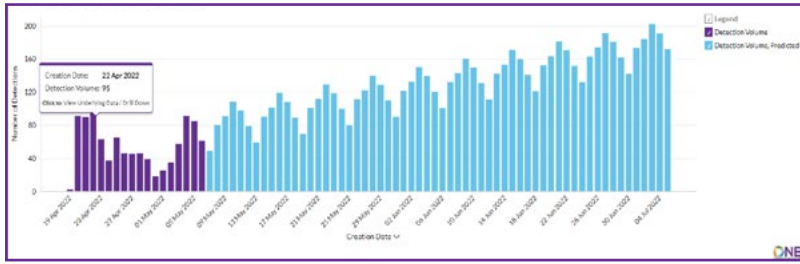

Production | Top 10 Suspect Assets

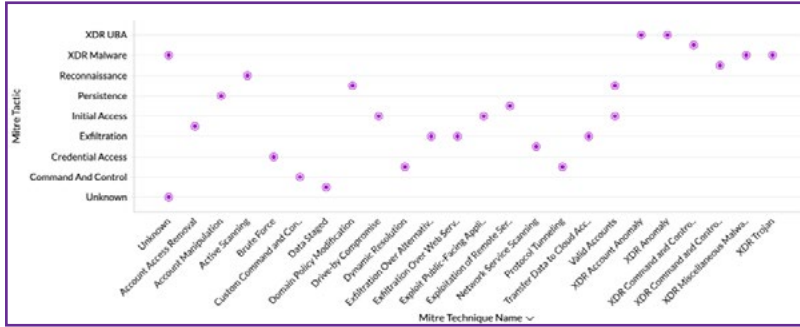

Production | Detection by Data Source

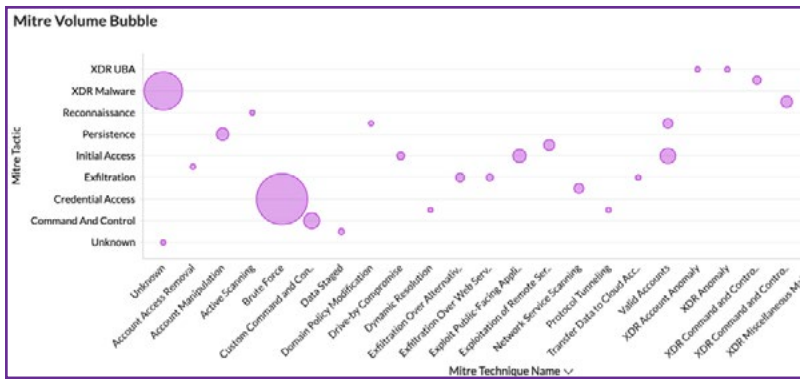

Production | Detection Volume Forecasting

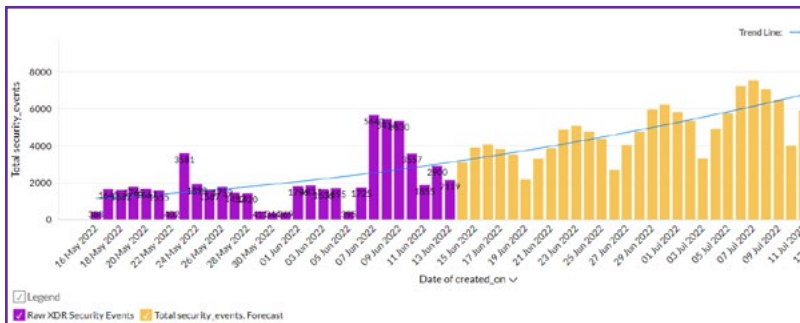

MITRE Technique x Tactic Production

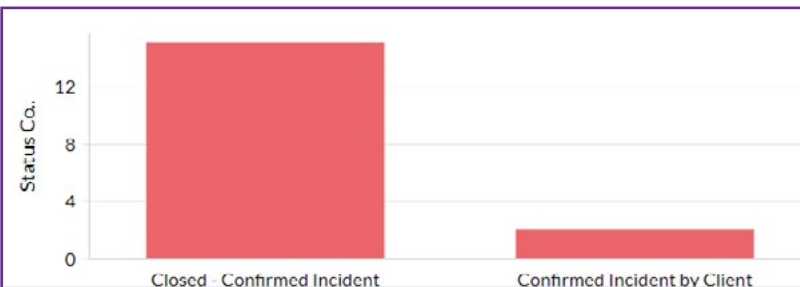

MITRE Volume Bubble
